

JUNE 7 - 23, 2024

RE:PLACE ACADEMY

Collaboration is the key to a regenerative future.

Can we accelerate the mutual trust and faith required for radical collaboration within a matter of days? Can place become a catalyst for knowledge sharing and transformative interventions? Can emergent technology be in service to truly regenerative change-making?

The Re:Place Academy Voyage aims to answer these questions. We're convening a cohort in North Wales to tackle challenges of knowledge commoning and place-based innovation.

Starting June 7th, 2024, a diverse group will gather for a 17-day immersive hackathon. Hosted in a 100-year-old converted chapel in Snowdonia, we will co-create technological and social tools to empower multi-stakeholder solutions to our shared planetary challenges.

OUTCOMES

- Digital Story of Place leveraging collaborative speech-to-text knowledge graphing.
- Appreciation-based model for generating and distributing value.
- Data insights on applying decentralised organising methodologies in an immersive context.
- On-chain p2p learning flows in a living knowledge framework, designed for bioregioning.

APPROACH

- **Rooted in Place:** Applying regenerative systems-thinking principles to design and build tools that work at different orders of nestedness.
- **Deep Immersion:** Centering community living, integrating local wisdom, and resourcing from the heart of both ecosystems and people.
- **Radical Collaboration:** From structuring the Voyage to making decisions about product form & value, our first principle is co-creation.
- **Reflexive Experimentation:** Testing novel forms of ownership and governance through dynamic equity accounting and DAOs.
